Advances in Atmospheric Science and Applications

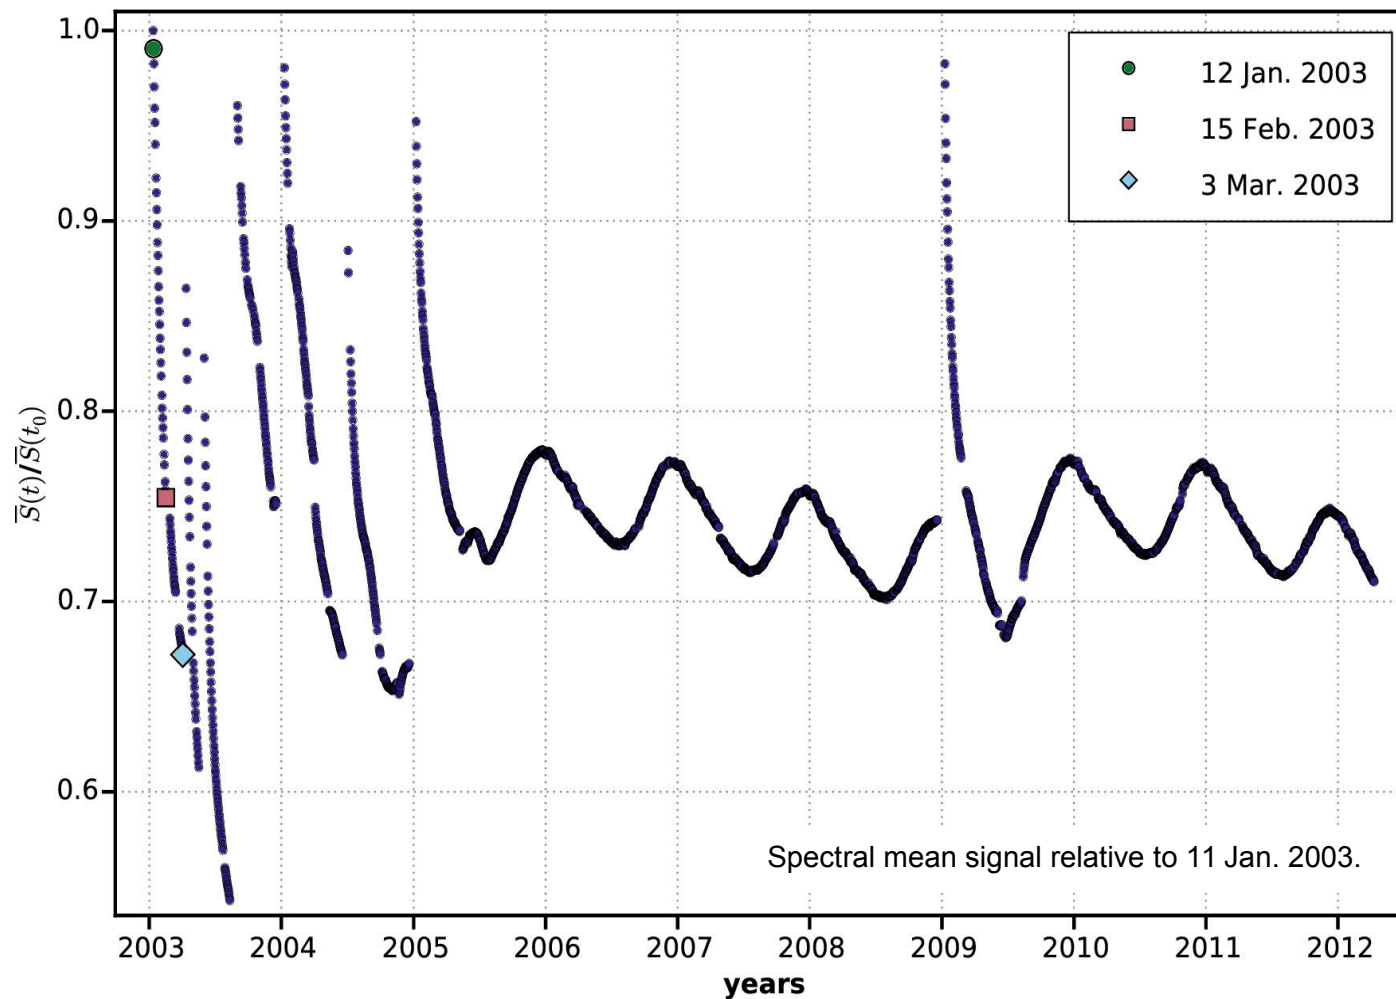

TROPOMI's CO retrieval code for the Sentinel 5 Precursor mission tested on 10 years of SCIAMACHY's 2.3 μm measurements

Tobias Borsdorff, Joost aan de Brugh, Paul Tol, Ilse Aben, Jochen Landgraf

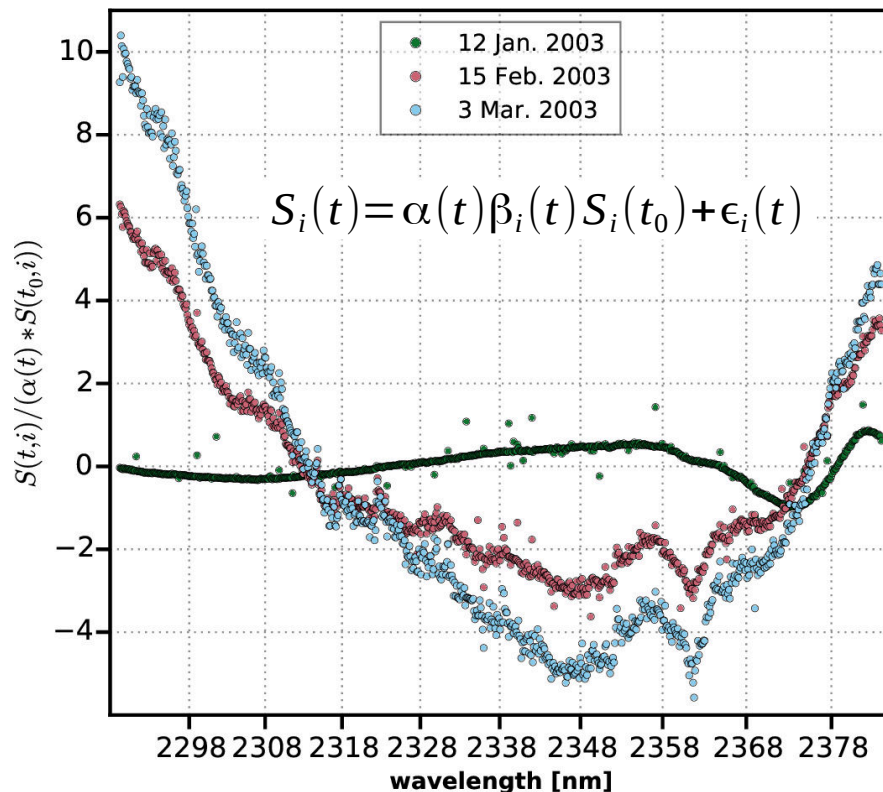

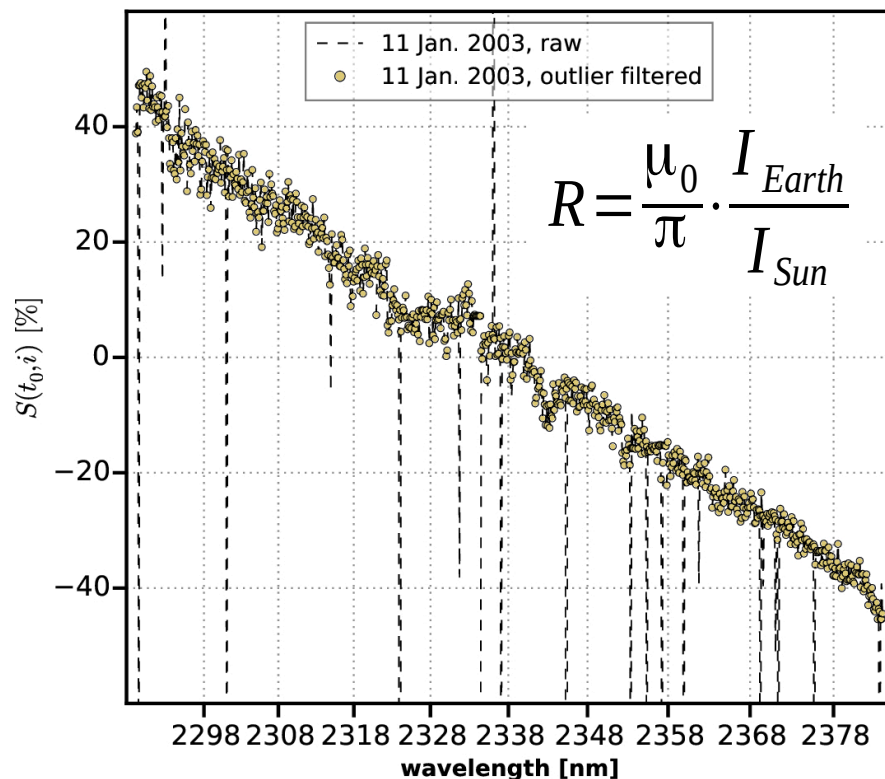

Netherlands Institute for Space Research (SRON)

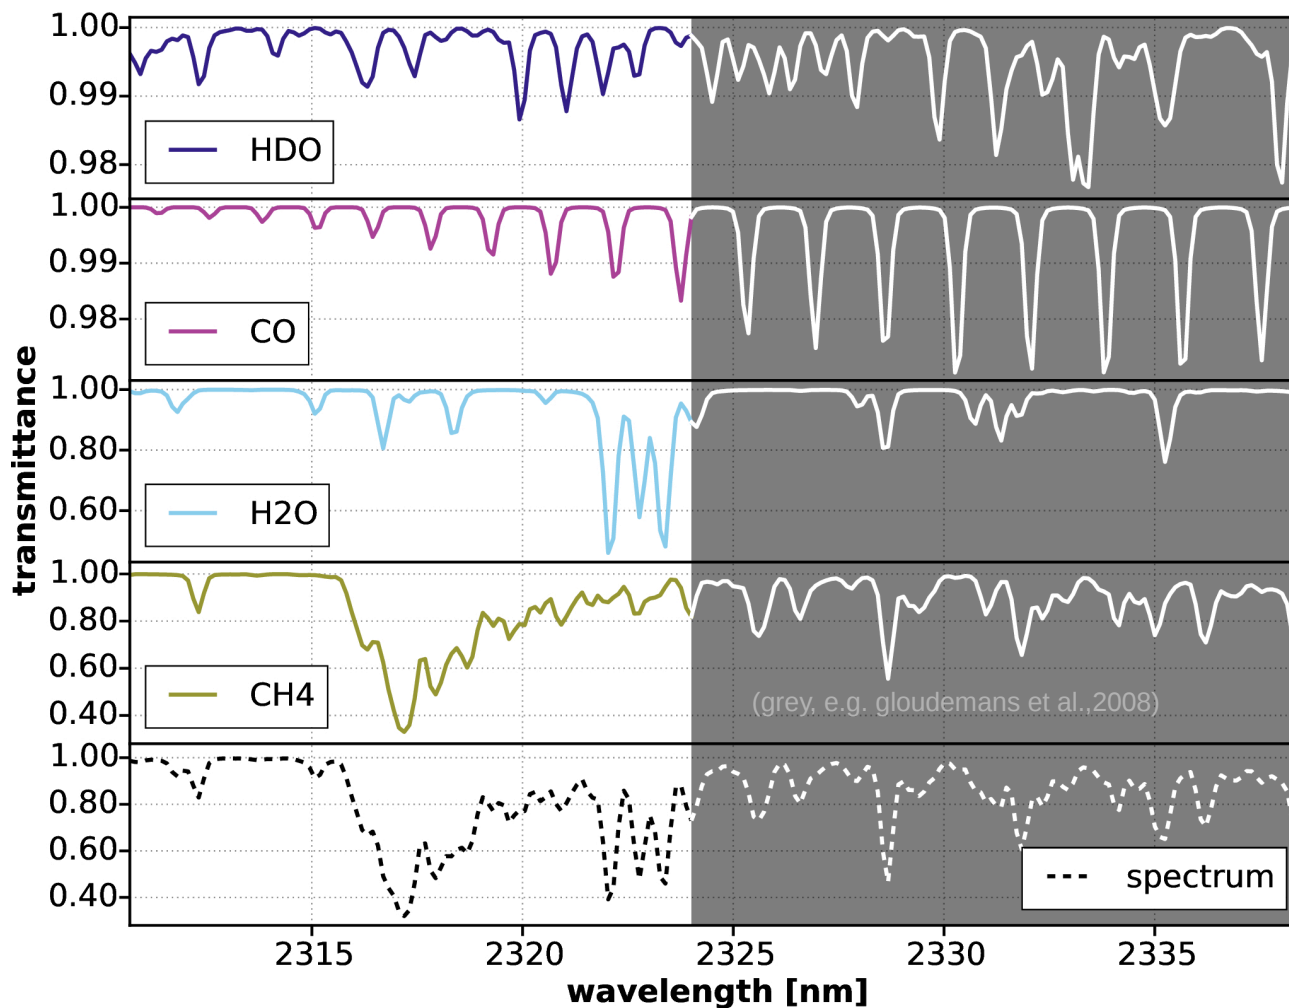

SCIAMACHY's daily sun measurements

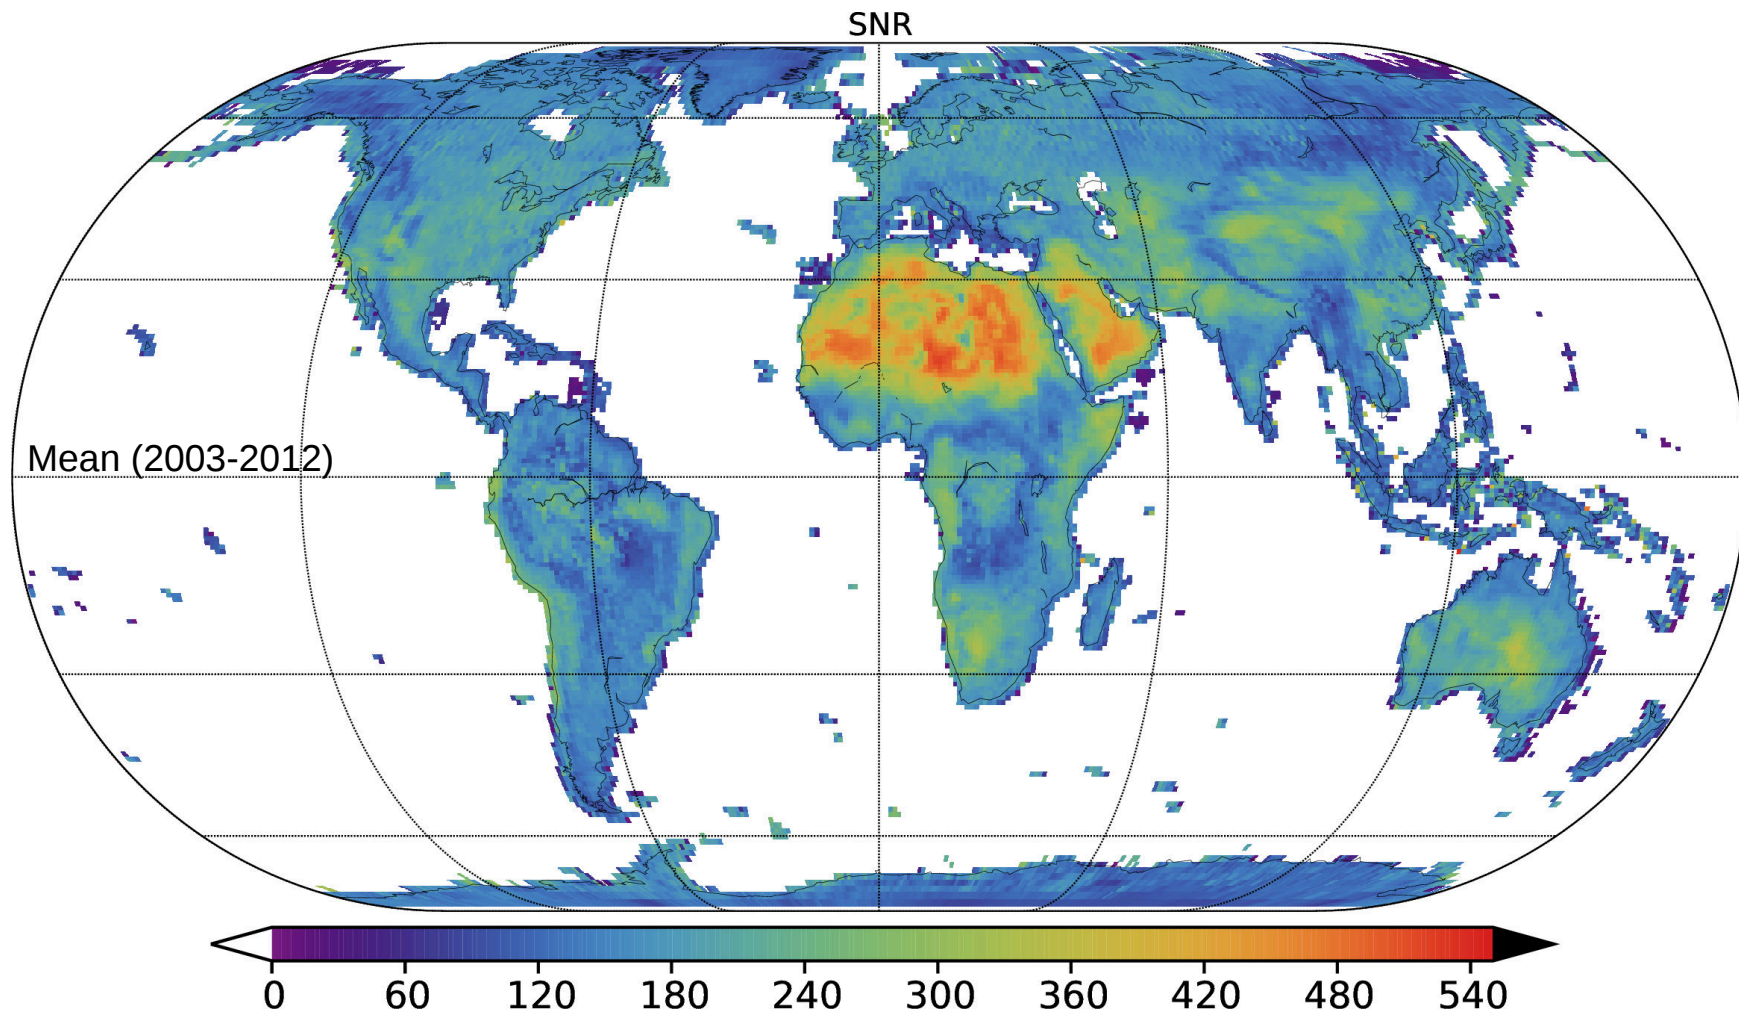

The need for a reflectance retrieval

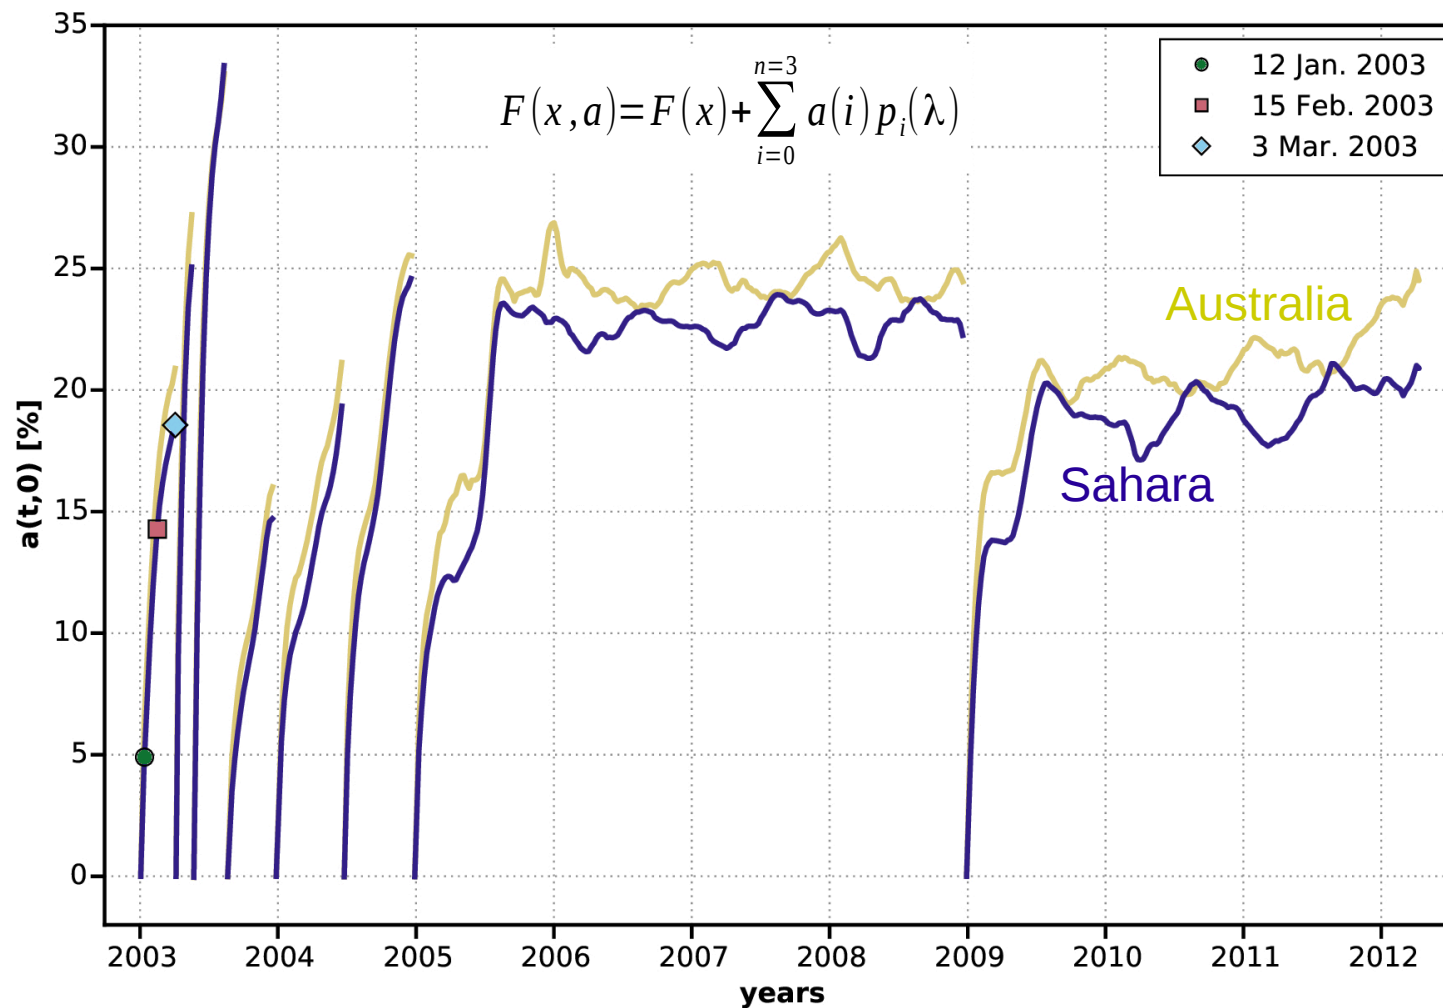

A wider CO retrieval window

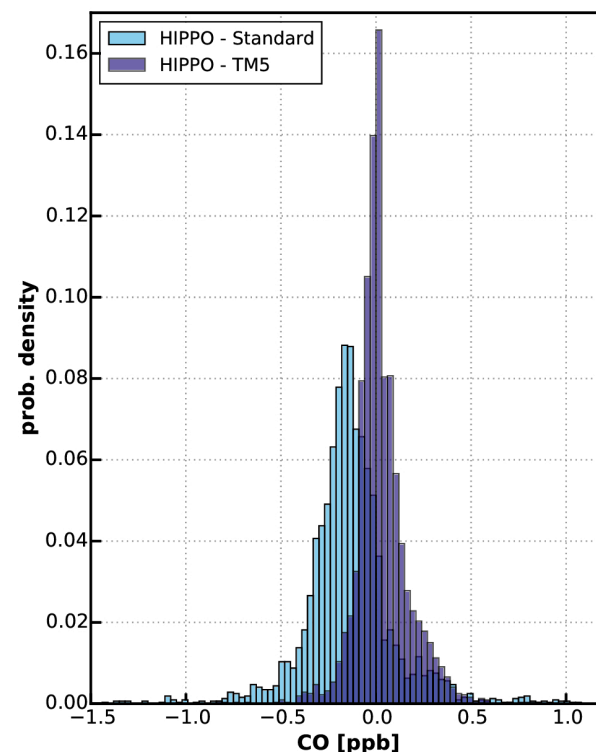

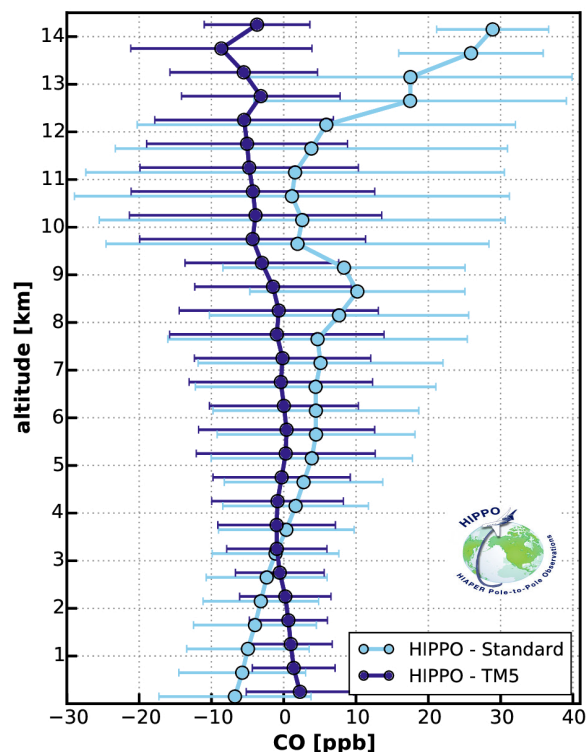

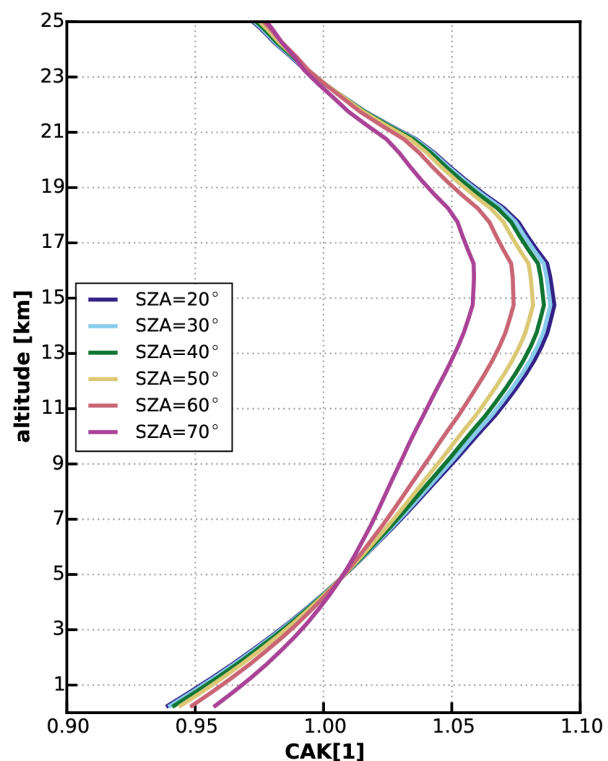

Signal to noise of SCIAMACHY spectra

Radiometric offset correction

Error of clear sky retrievals

Error of cloud contaminated retrievals

Borsdorff, T., Hasekamp, O. P., Wassmann, A., and Landgraf, J.: *Insights into Tikhonov regularization: application to trace gas column retrieval and the efficient calculation of total column averaging kernels*, *Atmos. Meas. Tech.*, 7, 523-535, doi:10.5194/amt-7-523-2014, 2014.

Validation: SCIAMACHY vs. NDACC/IRWG

Validation: SCIAMACHY vs. TCCON

Validation: bias (SCIAMACHY - FTIR)

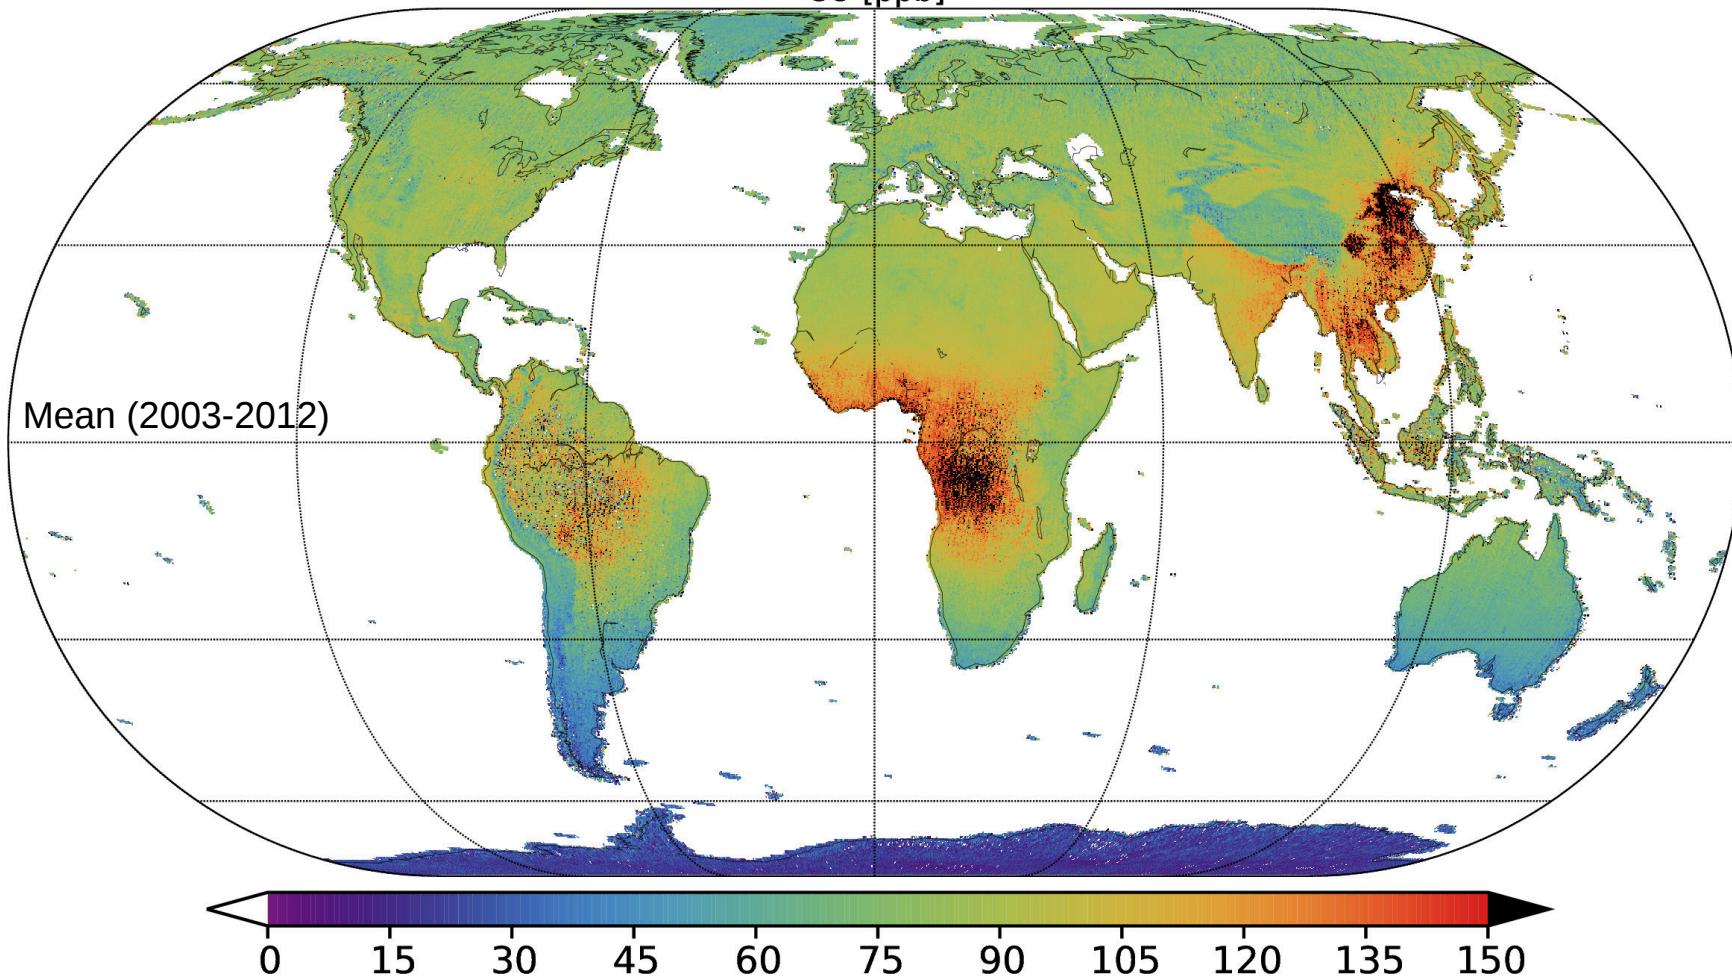

Data usage: spatial resolution

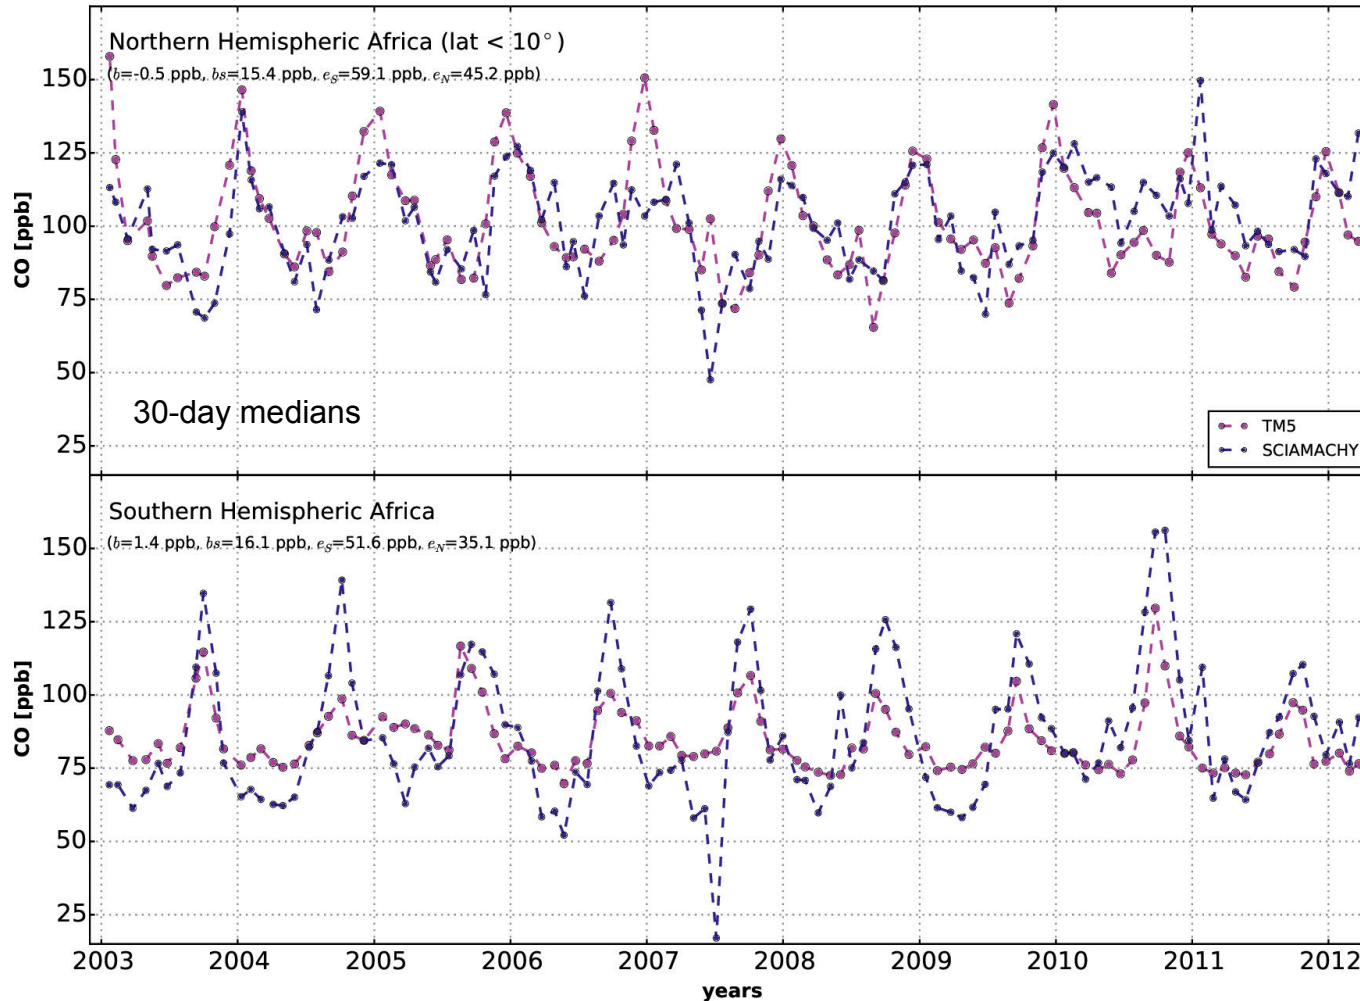

CO [ppb]

Mean (2003-2012)

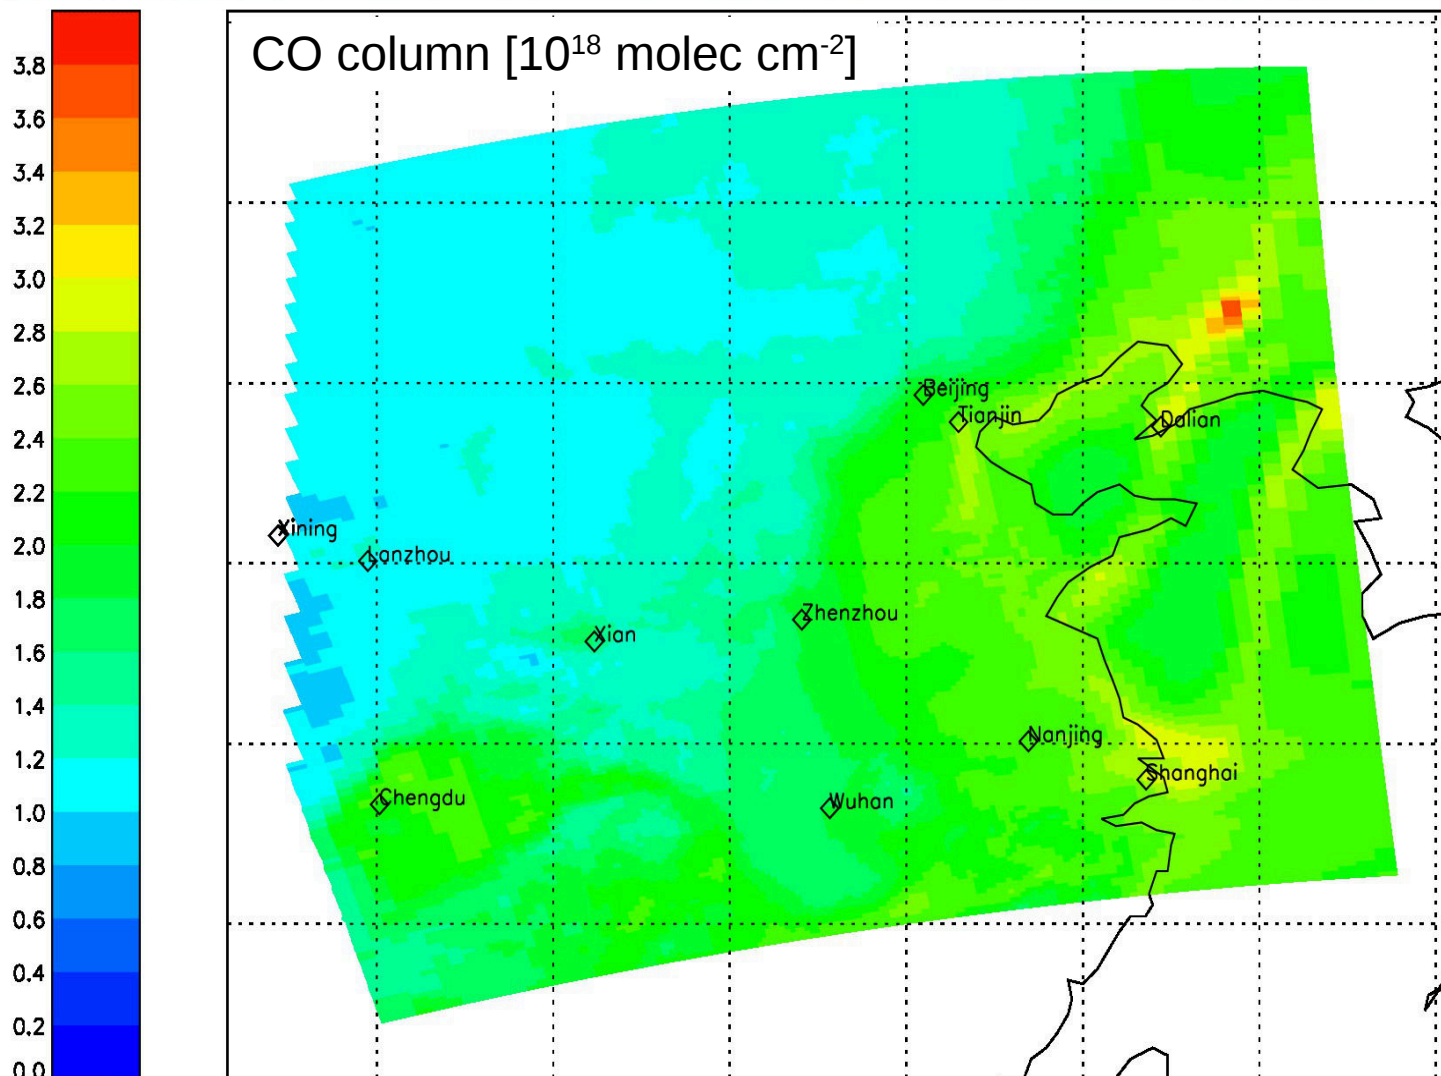

cylindrical equal area projection (nlat=180, nlon=360)

Data usage: temporal resolution

TROPOMI: single overpass over china

Summary and conclusions

- **TROPOMI CO retrieval code performs good on real data:**
 - good agreement with TCCON (0.1 ± 7.5 ppb).
 - bias with NDACC/IRWG (-8.9 ± 8.3 ppb)
 - good agreement with TM5 over Africa
- **Next: TROPOMI cloud retrieval with SCIAMACHY spectra**
- **Now available: full mission SCIAMACHY CO dataset**
(cloud free scenes over land)
