Glacier change from the ground: Morteratsch

... and from space

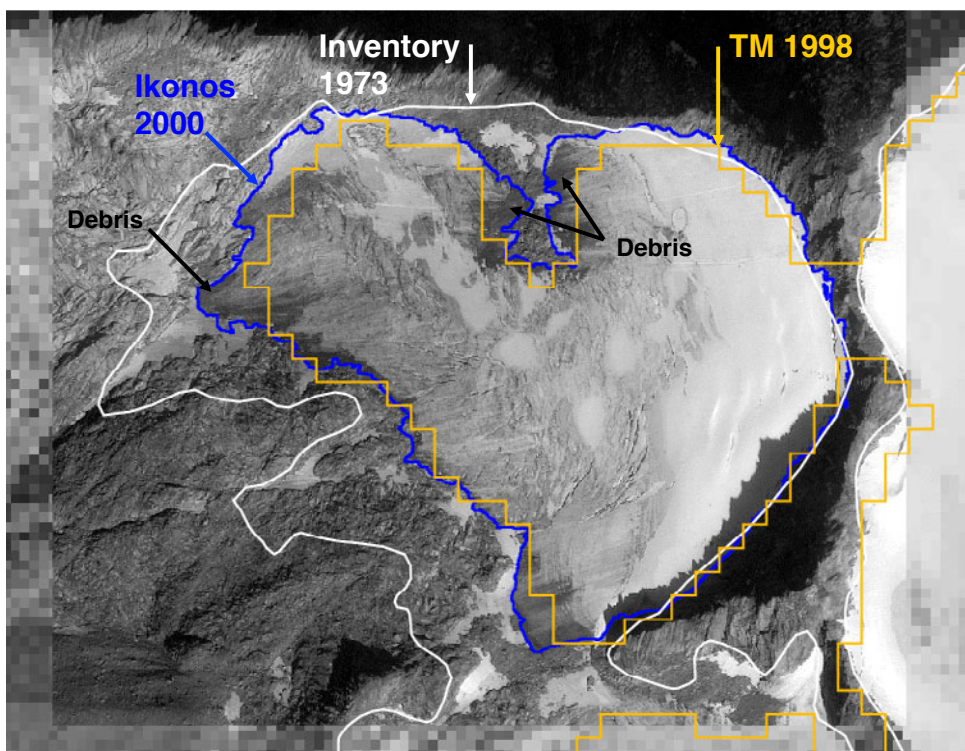

... and from space

Accuracy: Comparison with TM543

Accuracy: Comparison with HR Ikonos

Accuracy: small scale change assessment

Spatial resolution: Landsat 8 OLI (30 m)

Landsat data: USGS

Spatial resolution: Sentinel 2 MSI (10 m)

Sentinel 2: Copernicus 2015

Glacier mapping with Landsat 8 OLI & Sentinel 2 MSI

all colours 1.40
removed by 1.38

all colours 2.7 - 95
removed by 2.8 - 105
removed by 2.8 - 115

MSI requires an additional threshold in the blue band to achieve the same performance in cast shadow as OLI
